Amendments

Assistant Commissioner for Patents
Washington, District of Columbia 20231

Sir:

In response to the Office Letter mailed on 06/14, 2005, please amend the above application as follows:

1. Add the following claims:

[Claim 2] 2. An erect-king band used for treatment of impotence and premature ejaculation, designed to fulfill two functions: (1) allow blood to flow into the sponge-like tissue to achieve the penial erection, and (2) restrict blood to flow back from the sponge-like tissue to maintain the fully erectile state, comprising:

- (a) a rubber band;
 - (b) a first hook-and-loop fastener, which is not wider than said band, attached to a first end of said band;
 - (c) a second hook-and-loop fastener, which is not wider than said band, attached to a second end of said band and on the surface of said band opposite to the surface which said first fastener is attached to;
 - (d) a first marker on said first fastener to indicate the position where the front end of said second fastener reaches when the two said fasteners join together during the first stage of erection;
 - (e) a second marker on said first fastener to indicate the position where the front end of said second fastener reaches when the two said fasteners join together during the second stage of erection to achieve full erection status;
- wherein two said fasteners join together at the positions defined by two said markers to form a loop structure encircling the penis shaft at the junction of the penis and
